

Basically works against cyber crime and helps people to ensure cyber security!

Why We Start Project?

National Cyber Security Index How much do you know about It will take all the money out of your life at once so we want it to be with no people. We work on that. I hope you understand! In today's world of digital technology, all services around the world are becoming digital, and so is the risk of cyber-attacks. To prevent this risk and to protect e-governance with the Arc block protocol, an online e-Government Computer Incident Response Team or BGD e-GOV CIRT was established in 2020. Since its inception, it has been working to develop the Cyber Index by leading the country in the national and international cyber arena and gaining membership in various international organizations, forums and organizations. Following this, the National Cyber Security Index was contacted in 2016 and they were provided with all the necessary information. The data is created in the latest index of the organization after verification and selection

What's National cyber security?

The National Cyber Security Index is a global index that measures countries' readiness and measures to prevent cyber threats and cybercrime. The National Cyber Security Index serves as a database of evidence, data and information open to all, as well as a means of enhancing cyber security capabilities. The National Cyber Security Index provides accurate and up-to-date information on the national cyber security situation in any country and the initiatives taken. This index is made in five steps:

1. National level cyber threat identification
Identify national cyber security measures and capabilities
2. National cyber security measures and capability identification
3. Selection of important and measurable subjects
4. Development of cyber security indicators
Sort cyber security indicators by subject.
5. Existing laws on cyber security are legal laws, regulations, orders, etc.
6. Units / Institutions established for working with cyber security: Existing institutions, departments, etc.
7. Methods of Mutual Cooperation between Different Departments / Institutions in Working on Cyber Security: Committees, Working Groups, etc.
8. Outcomes of Cyber Security Initiatives: Policies, Cyber Practice, Technology, Websites, Programs, etc.

Notice the picture and try to understand

Gradually the number of these crimes is increasing so now is the time for us to turn around

Notice that you have made people's lives miserable so we work against it .

ROAD MAP

November 2020:Project Started.

December 2020:Coming Website,Whitepaper.

March 2021:Coming Airdrop.

April 2021:List On Exchange.

April 2021: Start PrivetSell.

May 2021:End PrivetSell.

June 2021:Staking and Wallet Coming.

July 2021-July 2022: Top 10 List On Exchange.

List Target Binance XT,Latoken,Dex Trade,Coinsbit,Hotbit,Kucoin,Hoo,Others.

FINANCE PLAN

- Token name: ARC BLACK PROTOCOL

- Unit name: ABP
- token type: BEP20 issued on Binance Smart Chain(BSC)
- total supply: 500000000

Project Finance will be allocated as follows

Co & team : 40%

Presale : 5%
Development : 5%
Airdrop & Bountry Distribution : 10%
Use of employeers flexible saving:15%
Staking : 25%

All transactions is recorded, scan on smart contract at address

<https://bscscan.com/token/0x1afd7b4faf6940872f69e55237155c7b36fd5153>

, investors can check transparently.
